Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Railroad Derailment, City of Industry, Los Angeles County, Hazardous Materials Spill Report: 18-1310

On 02/28/18 at 0034 hours, the California State Warning Center (CSWC) received a report from Union Pacific Railroad that one empty railcar derailed in the upright position due to an unknown cause.

- One set of trucks came off of the track.
- There were no hazardous materials released.
- There were no injuries.
- Rail traffic was not impacted.
- The CSWC made notifications per SOP.

Telecommunications Systems Maintenance, Cal OES Southern Region

On 02/26/18, Cal OES Southern Region had pre-planned network maintenance at the base in Los Alamitos which resulted in an outage of data, phones, and internet.

- Per the Cal OES ITDO as of 02/27/18 at 2049 hours, the connection has been restored to Los Alamitos.

FIRE ACTIVITY

- None reported.

WEATHER OF CONCERN

Weather of Concern

- Heavy snow is expected for the later half of this week for a large portion of the North State and the North Coast.
 - Snow levels will be around 2,500-4,500 feet today and drop to around 1,000 feet by early 03/02/18.
 - Snow accumulations will range from a few inches in the coastal mountains to more than three feet at the highest elevations in Trinity County with significant snow at many passes.

WEATHER SYNOPSIS BY REGION

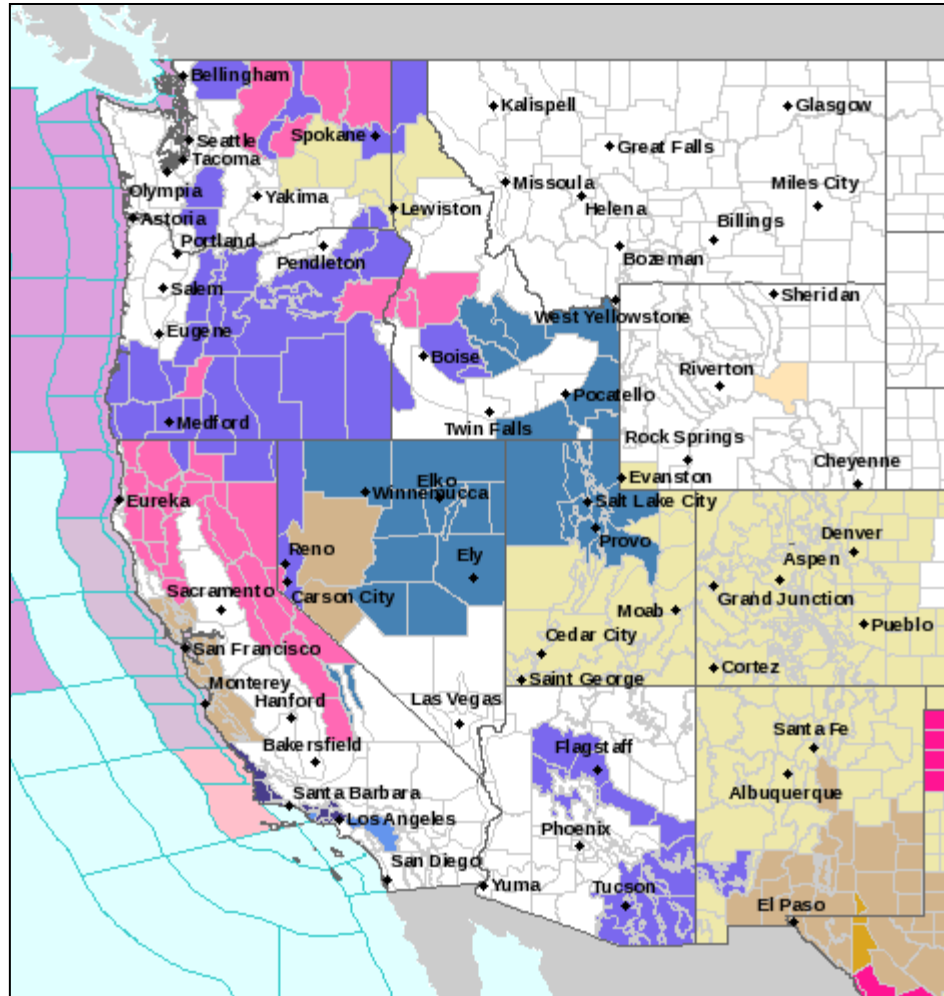

NORTHERN CALIFORNIA

Another, cold, wet weather system will arrive today and linger into the weekend. Fairly low snow levels are anticipated with this next system, around 2,000-3,000 feet in the north during the bulk of the precipitation and around 3,500-5,000 feet in the south. Snow levels are likely to remain fairly low Friday and Saturday as well with conditions over the weekend mostly gradually decreasing showers so that by Sunday just a few mountain showers are expected. Snow amounts will vary from a few inches at the lowest elevations to several feet in the higher mountain locations. Winter driving conditions can be expected to develop late today and last into Friday with snow on roads to lower elevations than happens most of the time during winter. There will also be a chance of a few thunderstorms later this week. Periods of gusty northerly winds will continue through this afternoon for many areas with peak gusts still mostly 25-35 mph, but they can be locally 40-50 in the most favored areas. Moderately strong, gusty southerly winds will develop over the region today and decrease from the west Thursday with peak gusts mostly 25-40 mph but with 50-60 mph possible in the highest elevations.

SOUTHERN CALIFORNIA

There will be a break in the shower activity today in between storms. Showers will start across Central California once again Thursday morning and across Southern California Thursday night as a strong storm approaches the Pacific Northwest. Showers with this storm will continue through Saturday. Most locations will receive between a half inch and an inch of rainfall. However, the Big Sur Coast and the Central Sierra will receive 1 to 3 inches of rainfall. The snow level will be around 5,000 feet. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Thursday afternoon through Saturday. Temperatures will be between 5 and 10 degrees below normal today through Saturday, with upper 30s and 40s across the mountains and 50s to low 60s in the valleys. A weak ridge of high pressure will bring a few degrees of warming each day and light winds to the region Sunday through early next week.
